Hon. Commissioner of Patents and Trademarks
Washington, D.C. 20231

Dear Sir:

AMENDMENT UNDER 37 C.F.R. § 1.115

Please amend claims 1, 5-8, 28-31, 34-35, 46 and 53 as follows:

-1- (Twice Amended)

A battery to which is attached a label that contains a tester for the battery,
said battery comprising a conductive housing, a first terminal, and a second terminal,
wherein the label is comprised of an insulative layer that is adhered to [a] said conductive
housing of the battery and a tester circuit which is disposed on [the] a surface of the
insulative layer, said insulative layer providing thermal and electrical insulation between said
conductive housing and said tester circuit, and wherein said tester circuit has a first terminal
contact end to contact [a] said first terminal of the battery and a second terminal contact end
to contact [a] said second terminal of the battery, which ends are electrically connected to
each other via an area of controlled resistivity, and an indicating material disposed in
thermally responsive contact with the area of controlled resistivity in the tester circuit.
